

## Twenty-Five Years of Excellence 1984-2009

***HydroComp, Inc. is pleased to announce our twenty-fifth anniversary!***

Twenty-five years ago HydroComp was formed with a mission to “provide naval architects and ship builders with resistance and propulsion analysis solutions of the highest technical excellence.”

HydroComp was formed as a corporation in 1984 by Jill Aaron [Managing Director] and Donald MacPherson [Technical Director]. This partnership continues to direct HydroComp's evolution and growth, resulting in a dynamic consultancy known worldwide for its software and services, most notably in the area of performance prediction. HydroComp developed a significant international presence early in its history – now serving software customers and consulting clients in over 50 countries. Most of the world's major propulsion equipment manufacturers and research institutions count themselves among HydroComp's clients.

**NavCad™** is still HydroComp's flagship product, with users in all corners of the world from design to construction to academia. In addition to **NavCad™**, HydroComp's software products grew to include **PropExpert™**, **PropCad™**, and **SwiftCraft™** programs for propeller sizing & analysis, propeller CAD, and resistance and powering.

Consulting services have always been an important part of HydroComp's business offerings. HydroComp provides a broad range of technical services to companies large and small. Combined with a progressive internal R&D program, these on-going technical services help keep HydroComp staff at the cutting edge of contemporary knowledge and expertise.

Supporting this worldwide effort over the last 25 years has been a number of international representatives, most notably an 18-year association with Design Systems & Technologies of Antibes, France and a 12-year association with AP& GF Software representing South America. HydroComp is also excited about new alliances with SEALS Ltd of Japan and UIT Solutions of Korea.

HydroComp is focused on being socially responsible both within and outside of the industry. This includes numerous publications and presentations on maritime subjects; as well as donations to the Juvenile Diabetes Research Foundation.

HydroComp is justifiably proud of its twenty-five years of enthusiasm by its staff, dealers, its dedication to its original mission, and the loyalty of more than 600 companies worldwide.
